Applicant(s) invention relates to a watercraft motor, and more specifically, to an electrical part of the watercraft motor.

The watercraft motor among other elements has a powerhead with an engine driving a multi-mode alternator, a switching regulator is configured to receive an AC power from the alternator and deliver DC power for needs. The engine control unit (ECU) configured to control the switching regulator according to the "first interrupt" or the "second interrupt" as disclosed.

There are inventions in the field that provide similar functionality and/or have similar features, as prior art of record shows. Applicant(s) invention differs from the prior art of record by the configuration of its switching regulator and control unit, which perform operational control according to the first or second interrupts, as disclosed and claimed, and which examiner's search failed to find.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
